

Jon Addison's 20 Tips for becoming a better modeler

Jon Addison will be hosting a workshop on '**20 Tips for becoming a better modeler**' .

Jon has been in the hobby since 1993. He always had an interest trains and has attended a small train show in 1994 where he meant his future mentor when it came to scratch building ...Dan Bolda. The things that Jon learned from Dan as well as things he read inspired him to expand his modeling skills and build the Silverton Central RR .

Becoming good friends with Dave Revelia and the late Brian Nolan later on didn't hurt either. His love of scratch building and sharing tips will help you with those fabulous models you might wish to build.
